

Type	Botanical Name	Common Name	Flower Color	Description	Growth
Bog	Acorus calamus	Calamus		Hardy wetland plant with sword-shaped green leaves. Medicinal plant. Edible. Elongated green leaves. White flowers grow on a branching, long stem. Medicinal qualities. Edible. CA native.	Grows 3' height. Moist soil to 6" below water surface. Good watershed filter. Withstands frost. Must be wet at all times. Grows to 3' tall.
Bog	Alisma plantago-aquatica	Water Plantain	white		
Bog	Alnus rhombifolia	White Alder		Deciduous riparian tree. Fast growing. Tolerates heavy soil, sun or shade, and flooding. Fast growing coastal wetland tree. Red flowers, grayish-brown bark. Good for erosion control. CA native.	Grows to 40' tall. Prefers moisture. Tolerates wind. Grows to 75' tall. Salt tolerant. High nitrogen fixer.
Bog	Alnus rubra	Red Alder			
Bog	Anemopsis californica	Yerba Mansa	white	Conic white flowers and bluish-tinged leaves. Medicinal herb. Native to southwestern North America. CA native.	Prefers brackish water. Propagates by runners. Grows 12" tall and 2-3' wide.
Bog	Baccharis glutinosa	Marsh Baccharis	white	Grows in salt marshes. Good nectar source. Green-brown stems and silver-green foliage, white flowers. CA native.	Grows to 3' tall. Keep moist.
Bog	Betula occidentalis	Water Birch		Multi-stemmed riparian shrub found along mountain streams. Bronze bark. Important habitat plant. CA native.	Grows to 30' tall. Flood tolerant. Moist, rich soil.
Bog	Bolboschoenus maritimus	Seaside Bulrush		Salt tolerant bulrush. Upright green stems. Ecologically important as wind & current buffer, reducing erosion. Provides wildlife habitat. CA native.	Grows to 5' tall. Prefers partial submersion or bog.
Bog	Caltha palustris	Marsh Marigold	yellow-gold	Large round leaf, buttercup yellow flowers, first to bloom in spring. Found along streams, marshes. Attracts insects. CA native.	Clumping Grows to 8-12" height. Prefers filtered sun and moist soil. May be summer dormant.
Bog	Carex barbarae	Basket (Santa Barbara) Sedge	red-brown	Clumping sedge with bright green blades and tufts of reddish-brown flowers. Good for containers. Used in basket weaving.	Regular moisture. Can be invasive. Grows 1-2' tall.
Bog	Carex nudata	Black Flowering (Naked) Sedge	black	Bright green dense mounding sedge. Black flowers. Dies back in winter. Good for containers. CA native.	Can be partially submerged. Grows 1-2.5' tall. Keep moist.
Bog	Carex obnupta	Slough Sedge		Grass-like foliage with wheat-like tops, flat dark green leaves. CA native.	Tall clumping grass-like plant grows in moist boggy conditions. Height 2'-3'.
Bog	Cyperus eragrostis	Tall Flatsedge		Grows in seasonal creeks and wet areas. Can be invasive. CA native.	Grows to 3' tall. Prefers wet clay or gravel.
Bog	Eleocharis macrostachya	Common Spike Rush		Perennial rush-like sedge found in moist habits. Bright green erect stems. Habitat plant. Good rain garden and border plant. CA native.	Grows to 3' tall. Keep moist. Salt tolerant. Can be slightly submerged.
Bog	Epipactus gigantea 'Serpentine Night'	Stream Orchid 'Serpentine Night'		Dark burgandy leaves and stems. Flowers in spring. CA native.	Moist soil. Grows to 3' tall.
Bog	Epipactus gigantea	Stream Orchid		Dark green leaves and stems. Flowers in spring. CA native.	Moist soil. Grows to 3' tall.
Bog	Equisetum arvense	Field Horsetail Rush		Perennial fern with green hollow segmented stems. Sterile stems branch in regular whorls; fertile stems produce spores. Medicinal uses.	Grows 2-20" tall. Frost tolerant. Can be invasive.
Bog	Equisetum hyemale	Scouring Horsetail Rush		Ancient Fern with dark green hollow segmented stems, turns orange in cooler weather. Cone shaped spores at tips of single stems. CA native.	Grows to 3'. Prefers wet soil. Can be invasive.
Bog	Equisetum hyemale v. robustum	Giant Scouring Horsetail Rush		Especially tall fern, dark green hollow segmented stems, turning orange in cooler weather. Cone-shaped spores at tips of stems. CA native.	Grows to 4' or more. Prefers wet soil. Can be invasive.
Bog	Equisetum laevigatum	Smooth Horsetail Rush		Perennial fern with bare green tubular stalk, tipped with brown cone. Dark bands up stalk with few branches. CA native.	Keep moist. Grows to 6' tall, but usually 2-3'. Can be invasive.
Bog	Equisetum telmateia	Northern Great Horsetail		Perennial fern with green hollow segmented stems. Sterile stems branch in regular whorls; fertile stems produce spores. Subspecies native to CA.	Forms colonies. Prefers damp shady area. Can be invasive.
Bog	Helenium autumnale	Common Sneezeweed	yellow	Large bright yellow daisies on 2-3 ft. stems. Lance-shaped green leaves. Attracts pollinators. Does not cause hayfever! CA native.	Keep moist. Grows 2-3' tall.
Bog	Helenium bigelovii	Bigelow's Sneezeweed	yellow	Golden daisy like flowers, round dome center on 2-3 ft. stems. Lance-shaped green leaves. Attracts pollinators. Does not cause hayfever! CA native.	Keep moist. Grows 2-3' tall.
Bog	Helenium puberulum	Rosilla Sneezeweed	yellow	Golden very small petals which quickly disappear to leave spherical center. Attracts pollinators. Does not cause hayfever! CA native.	Keep moist. Grows 2-3' tall.
Bog	Hibiscus californicus syn. Lasiocarpus	California Hibiscus	white	Wetland hibiscus native to Sacramento River Delta. Fuzzy green leaves and broad white flowers. Dormant in winter. Rare CA native.	Grows 3' tall. Prefers part shade and moist soil. Tolerates clay.
Bog	Hydrocotyle ranunculoides	Floating Marsh Pennywort		Bright green aromatic marsh plant. Long creeping stems form dense mats. Shiny, leathery round leaves. Used as a Chinese herb. CA native.	Grows in swampy areas or on water surface. 2-6" above water surface. Can be submerged.
Bog	Hydrocotyle verticillata	Little Umbrellas Pennywort		Creeping plant with round, deep green, umbrella-like foliage and umbel of white flowers.	Boggy moist soil to full submersion. Grows 2-3" in height.
Bog	Iris longipetala	Coast Iris	lavender-blue	Uncommon CA native restricted to swales and moist areas in coastal grasslands from San Francisco to Monterey. Bluish-green leaves. CA native.	Prefers moist soil. Clumping, Grows 20' tall.
Bog	Juncus effusus	Soft Rush		Dark green foliage with seedy flower clumps in spring. Evergreen with round stems & brown flowers in summer. Drought tolerant.	Grows 2'-3' tall. Keep soil moist. Clumping.
Bog	Juncus lescurii	Salt Rush		Dark green stemmed rush, grows in freshwater and salt marshes and near sand dunes. Can be found in clumps or single stems. CA native.	Grows 2'-3' tall. Keep soil moist. Clumping.
Bog	Juncus patens	California Gray Rush		Evergreen with blue-grey spines and brown seedy flower. Clumping. Native to U.S. west coast. Clumping.	Tolerates most conditions. Can be submerged to 4". Sun for flowering. Height 18"-30".
Bog	Juncus patens 'Elk Blue'	Elk Blue California Gray Rush		Evergreen with blue-grey spines and brown seedy flower. Clumping. Native to U.S. west coast. Clumping.	Tolerates most conditions. Can be submerged to 4". Sun for flowering. Height 12-18".

Type	Botanical Name	Common Name	Flower Color	Description	Growth
Bog	<i>Juncus xiphioides</i>	Irisleaf Rush		Interesting sculptured rush with wide blades and flowers clumps appearing like iris blooms. CA native.	Keep moist. Grows to 2' tall.
Bog	<i>Limonium californica</i>	Western Marsh Rosemary		Also called Sea Lavender. Thick woody base, wide leaves, and pale-lavender flowers on vertical stalks. CA native.	Tolerates salt, alkaline, and poor drainage conditions. Keep moist. Grows to 1/2' tall.
Bog	<i>Mimulus guttatus</i>	Seep Monkey Flower	yellow	Perennial wildflower growing along streams. Long, tubular bright yellow flowers.	Fast growing. Wetland plant.
Bog	<i>Oenanthe sarmentosa</i>	Pacific Water Parsley	white	Variety of water celery. Clumping groundcover with stalks of small white flowers. CA native.	Keep moist. Groundcover.
Bog	<i>Potentilla anserina</i>	Silverweed	yellow	Yellow flowers in summer with serrated green foliage. CA native.	Low growing to 6" tall. Prefers boggy conditions.
Bog	<i>Ranunculus californica</i>	California Buttercup	yellow	One of the first flowering plants of the year. Yellow flowers. Easy to grow and profuse bloomer. CA native.	Enjoys moist soil but will tolerate drought. Grows 1-2' tall.
Bog	<i>Ranunculus flammula</i>	Creeping Buttercup	yellow	Shallow water plant. Creeping perennial, tiny yellow flowers, delicate foliage. Blooms throughout summer. CA native.	Likes wet boggy soil. Grows to 1' height. Spreads by runners. Tolerates brackish water.
Bog	<i>Rubus ursinus</i>	California Blackberry		Native wild California blackberry. Evergreen. Excellent habitat plant. CA native.	Grows in patches up to 3' tall and 6' wide. Prefers moist soil but tolerates drought.
Bog	<i>Salix exigua</i>	Sandbar Willow		Tall shrub with narrow silky-gray leaves and gray bark. Good nectar source. Used for wetland restoration. CA native.	Keep moist. Grows 4-15' tall.
Bog	<i>Salix laevigata</i>	Red Willow		Deciduous shrub or tree with red-brown bark and pale leaves. Good for stream stabilization. CA native.	Keep moist. Grows to 45' tall.
Bog	<i>Schoenoplectus acutus</i>	Giant Bulrush (Tule)		Thick, erect green stems. Ecologically important as wind & current buffer, reducing erosion. Provides wildlife habitat. Used for baskets. CA native.	Grows to 3-10' tall. Prefers partial submersion or bog.
Bog	<i>Schoenoplectus americanus</i>	Three-Square Bulrush		Flowering rush with stiff three-angled stems. Food source for wildlife. CA native.	Keep moist. Grows to 2' tall.
Bog	<i>Scirpus cernuus</i>	Fiber Optic Grass		Bright green evergreen foliage with graceful, weeping stems. Good container plant. CA native.	Grows to 10"-14" tall. Prefers moist soil. Can be submerged to 2". Heat tolerant.
Bog	<i>Scirpus microcarpus</i>	Panicled Bulrush		Triangular stem with flat grass-like leaves sprouting from base and along stem. Can be used in standing water. CA native.	Keep moist. Grows 2-5' tall.
Bog	<i>Sidalcea calycosa</i> ssp. <i>Rhizomata</i>	Point Reyes Checkerbloom	pink	Rare CA native groundcover for moist spots. Pink 1.5" blooms; round, glossy, scalloped leaves. Vigorous.	May go dormant in drought conditions. Grows 6-12" tall.
Bog	<i>Veronica americana</i>	American Speedwell	blue	Dense patches of leafy stems with blue flowers. Perennial. Found in shallow water, vernal pools, swamps. Edible-like watercress. CA native.	Grows 4" tall, spreads 3'. Tolerates sandy and clay soils, cold, submergence.
Emerging	<i>Hippuris vulgaris</i>	Mare's Tail		Creeping perennial herb that roots underwater. Narrow pine-tree like foliage grows above water surface. Ideal as oxygenator.	Can be submerged to 12". Grows to height of 24" above water surface.
Emerging	<i>Menyanthes trifoliata</i>	Bog Bean (Buckbean)	white	Flowers stalks and leaves rise above water surface. Creeping rhizomes form colonies at pond edge. Star-shaped, hairy 5-petaled white flowers.	Prefers acidic, peaty soil. Grows to 12" tall. Submerge to 3".
Emerging	<i>Sagittaria cuneata</i>	Arum Leaf Arrowhead	white	Perennial marsh herb. Wide arrow shaped leaves, fleshy tuber like roots. Small white flowers grow on a single spike. CA native.	Grows best in calm, shallow water but can be submerged to 3'. Height 1-2 ft. Dormant in winter.
Emerging	<i>Sagittaria latifolia</i>	Broadleaf Arrowhead	white	Perennial herb. Very narrow leaves in arrowhead shape. Marsh plant. Small white flowers grow on a single spike. CA native.	Grows best in calm, shallow water but can be submerged to 3'. Height 1-2 ft. Dormant in winter.
Emerging	<i>Sagittaria montevidensis</i>	Giant Arrowhead	white	Aquatic freshwater herb found in shallow waters. Three white petal flowers with wine-red spots, grow on single stalk. CA native.	Grows best in calm, shallow water. Height 2'-3'. Hardy in mild winters.
Emerging	<i>Typha latifolia</i>	Common Cattail Rush (Cumbungi)		Narrow-leaved tall plant with velvety brown flower head. Classic pond plant. Good bird habitat. CA native.	Submerge. Dies back in winter. Likes brackish water. Grows 4'-8' tall.
Floating	<i>Lemna minor</i>	Duckweed		Floating aquatic plant -one of the smallest of all flowering plants! Forms carpet of green on water surface. Good food source for wildlife. CA native.	Must be in water at all times.
Floating	<i>Nasturtium officinale</i>	Water Cress	white	Fast growing aquatic or semi-aquatic herb. Edible.	Keep moist. Can be partially submerged or used as ground cover.
Landscape	<i>Mimulus aurantiacus</i>	Sticky Monkey Flower	orange	Cheerful blossoms of orange tubular flowers. Good nectar plant. Grown as shrub. CA native.	Tolerates drought and wet soils. Grows 2-3' tall. Requires good drainage.
Marginal	<i>Acer negundo</i>	California Box Elder	pink	Deciduous species of maple tree. Riparian tree tolerant to all weather conditions. Great shade tree. CA native.	Grows 10-15' tall. Keep moist. Fast growing.
Marginal	<i>Achillea millefolium</i>	Common Yarrow	white	Aromatic green fern-like foliage with long lasting clusters of white flowers. Attracts butterflies. Medicinal uses. Hardy. CA native.	Wide spreading. Can be mowed. Tolerates drought. Prefers sandy soil. Grows 2-3' tall.
Marginal	<i>Aesculus californica</i>	California Buckeye	white	Beautiful small tree, smooth gray bark, green palm-like leaves. Fragrant pink-white flowers. Drops leaves in summer. Attracts Swallowtail. CA native.	Grows to 15' or more. Enjoys water but tolerates drought. Toxic to mammals.
Marginal	<i>Alnus incana</i> ssp. <i>tenuifolia</i>	Mountain Alder		Multi-stemmed shrub or small tree. Food source for wildlife. Good for site rehab, streambank stabilization, erosion control. CA native.	Tolerates cold, low-med elevations. Rich, moist soil. Grows 20-40' tall.
Marginal	<i>Apocynum cannabinum</i>	Indian Hemp (Dogbane)	white	Wild meadow plant with small white flowers in summer. Used by Native Americans for rope. CA native.	Fast growing. Grows to 3' tall. Very moist to dry soil.
Marginal	<i>Artemisia douglasiana</i>	Mugwort		Attractive fragrant foliage with history of medicinal uses. Leaves are green on top, silvery beneath. Indistinct flower. Good for birds. CA native.	Grows to 3' tall. Keep moist.
Marginal	<i>Asclepias fascicularis</i>	Narrowleaf Milkweed	rosy-pink	Elegant, narrow leaves, bushy, clusters of rosy-pink flowers. Butterfly food, attracts pollinators. Deer tolerant. CA native.	Tolerates moist soil & drought, garden & clay. Grows 1-3' tall. Easy to grow. Dormant in winter.

Type	Botanical Name	Common Name	Flower Color	Description	Growth
Marginal	<i>Asclepias speciosa</i>	Showy Milkweed	pink-lavender	Flower clusters 4-5", pink-lavender, fragrant. Large blue-green leaves. Low toxicity. Attracts butterflies, honeybees, other pollinators. CA native.	Prefers moist soil but tolerates drought. Grows 2-3' tall. Dormant in winter.
Marginal	<i>Aster chilensis</i>	California Aster	lavender blue	Vigorous native perennial covered with soft lavender daisies. Attract butterflies. CA native.	Sprawling to upright. Grows 20-40" tall. Tolerate heavy watering and drought. Prune in winter.
Marginal	<i>Calamagrostis nutkaensis</i>	Pacific Reed Grass		Large bunch grass with wide green blades and attractive plume flowers. Good for woodland or meadow. Used in bioswales. Evergreen.	Grows 2-3' tall. Need some moisture. Deer resistant. Shade tolerant.
Marginal	<i>Calycanthus occidentalis</i>	Western Spice Bush	red	Deciduous shrub with bright green foliage, red flowers with scent of wine. Grows along streams & rivers. CA native.	Likes heat. Keep moist. Grows 5-12' tall. Can be pruned as hedge or small tree.
Marginal	<i>Carex pansa</i>	Dune Sedge		Durable spreading sedge that can be used as a native lawn substitute. Curling dark green foliage. CA native.	Stays green with regular moisture. Grows to 6" tall.
Marginal	<i>Carex tumulicola</i>	Foothill (Berkeley) Sedge		Durable groundcover. Evergreen. Good for erosion control. CA native.	Prefers some shade. Grows to 12" tall.
Marginal	<i>Cephalanthus occidentalis</i>	Buttonbush	white	Deciduous shrub good for rain gardens, attracts bees and butterflies. Perfectly round white-pink fragrant flowers, interesting year round. CA native.	Adjust to most moist soils. Grows 5-12' tall, 4-8' spread.
Marginal	<i>Cornus glabrata</i>	Brown Creek Dogwood	white	Deciduous riparian shrub, brown stems and green - brown - red leaves, with creamy white flowers. Good for birds. Deer resistant. CA native.	Grows 7-10' tall. Prefers moist soil, some shade. Good restoration plant. Do not submerge.
Marginal	<i>Cornus sericea occidentalis</i>	Western Redtwig Dogwood	white	Riparian shrub, forming broad clumps with red stems. Small white flower and fruit. Good for birds. CA native.	Grows 15-18' tall. Prefers wetland margins. Good restoration plant. Do not submerge.
Marginal	<i>Crataegus douglasii</i>	Black Hawthorne	white	Bushy cold-weather shrub/tree. Coarse gray bark; red new growth. White flower clusters. Edible fruits. Good erosion control. CA native.	Grows to 32' tall. Nutrient rich soil. Can be used as hedge. Drought tolerant.
Marginal	<i>Darmera peltata</i>	Indian Rhubarb	pink	Clumps of pink flower spikes. Broad, round leaves. Good for pond margins and marsh gardens. Native to mountains of N. CA.	Grows 2'-4' tall. Prefers cooler location. Keep moist.
Marginal	<i>Elymus glaucus</i> (contract grow only)	Blue Wildrye		Species of wild rye forming upright clumps of blue-green blades. Good coastal plant. Deer resistant. Will stay green when watered. CA native.	Grows 1' tall. Flower stems grow at least 2' tall. Prefers light shade in heat. Tolerates drought.
Marginal	<i>Fraxinus latifolia</i>	Oregon Ash		Medium-sized deciduous tree, symmetrical in shape, with olive green leaves and gray-green to brown bark. Leaves vivid yellow in fall.	Prefers damp, loose soil and occasional flooding. Full sun to part shade. 35-80' tall.
Marginal	<i>Grindelia stricta</i>	Salt Marsh Gumweed	yellow	Erect perennial or subshrub with bright yellow flowers. Easy to grow and vigorous. Attracts butterflies. CA native.	Grows to 3' tall. Tolerates seasonal flooding, salt. Deer resistant.
Marginal	<i>Lobelia cardinalis</i>	Cardinal Lobelia	red	Tall purple-red stems and burgandy leaves with bright red flowers at top. CA native.	Can be submerged. Grows to height of 2'-3'. Prefers very moist conditions.
Marginal	<i>Lobelia dunnii serratta</i>	Wild Blue Lobelia 'Serratta'		Delicate leaves and lavender blue flowers. Attracts pollinators. Groundcover. CA native.	Must be wet at all times. Winter dormant. Grows to 1' tall.
Marginal	<i>Lonicera involucrata</i>	Twinberry Honeysuckle	purple, red	Riparian deciduous shrub with beautiful red, purple and yellow flowers followed by black shiny fruit, edible but bitter. CA native.	Keep moist. Grows 6-10' tall. Very shade tolerant.
Marginal	<i>Lupinus polyphyllus</i> ssp. <i>superbus</i>	Streamside Lupine	pink or blue	Moisture loving lupine with variable growth habit. Showy white-pink to purplish-blue flowers. CA native.	Prefers moist habitats, cool temp, and seasonally wet soils, but will tolerate seasonal dryness.
Marginal	<i>Mimulus cardinalis</i>	Cardinal Monkeyflower	red	Robust perennial tubular red flowers attract hummingbirds and other pollinators. CA native.	Keep moist. Grows to 2' tall and wide.
Marginal	<i>Oxalis oregana</i> 'White'	White Redwood Sorrel	white	Woodland plant native to west US coastal forests. Attracts butterflies. Flower white with pink veins. CA native.	Moist soil. Ground cover. Prefers shade to part-shade.
Marginal	<i>Phyla nodiflora</i>	Texas Frog Fruit	pink	Rambling ground cover. Tolerates drought and flooding. Soft green leaves, pinkish flowers. Attracts butterflies. CA native.	Keep from frost. Usually found in wetlands. Sprawling.
Marginal	<i>Physocarpus capitatus</i>	Western Ninebark	white	Deciduous shrub with small clusters of white flowers and red fruits. CA native.	Tolerates high moisture but drought tolerant. Grows 4-8' tall.
Marginal	<i>Populus fremontii</i>	Fremont Cottonwood		Deciduous tree native to riparian zones. Good for bird & butterfly gardens. Older trees have whitish cracked bark. Good restoration plant. CA native.	Very fast growing 39-115' tall. Keep from septic systems.
Marginal	<i>Potentilla glandulosa</i>	Sticky Marsh Cinquefoil	creamy yellow	Tall perennial with creamy yellow flowers. Red stems. Flowers last longer in shade. CA native.	Grows 1-2' tall. Grows in shade and sun.
Marginal	<i>Potentilla gracilis</i>	Fivefinger Marsh Cinquefoil	yellow	Multi-stemmed with dark gray-green leaves and silvery undersides. Flowers are pale to dark yellow. CA native.	Grows 1-2.5 ft. Intolerant of shade.
Marginal	<i>Potentilla palustris</i>	Marsh Cinquefoil	maroon	Sprawling perennial with purple-red flowers. Related to the rose. Native to N. American wetland meadows. CA native.	Tolerates brackish water. Grows 8"-24" tall.
Marginal	<i>Quercus lobata</i>	Valley Oak		Fast growing white oak. Deeply lobed leaves, green with slight gray coloring. Can live hundreds of years.	Requires moderate watering but not bog. Grows to 70' tall. Can be planted in lawn when young.
Marginal	<i>Rosa californica</i>	California Wild Rose	pink	Deciduous shrub with single fragrant pink blossoms and red fruits. Good living fence. CA native.	Keep moist. Grows 3-5' tall.
Marginal	<i>Salix lasiolepis</i>	Arroyo Willow		Riparian shrub or multi-trunk tree, used for stream bank stabilization. Desiduous. CA native.	Grows to 35' tall. Frost tolerant; not salt tolerant. Grows in clay, sand, loam. Keep wet.
Marginal	<i>Sambucus mexicana</i>	Blue Elderberry	creamy yellow	Deciduous shrub or small tree. Grows along river and streams. Flat clusters of creamy yellow flowers then blue berries. CA native.	Grows 8-25' tall. Keep moist.
Marginal	<i>Scrophularia californica</i>	Beeplant (Figwort)	maroon-red	Purplish-red new growth that turns green. Many small maroon-red flowers. Attracts pollinators. CA native.	Forms large colonies in open spaces. Grows 2-3.5' tall.
Marginal	<i>Sisyrinchium bellum</i>	Blue Eyed Grass	blue	Small clumping grass with iris-like leaves. Blue star flowers grow at tip of leaf. Native to California. Evergreen.	Grows to 12" tall. Grows in wetlands and woodlands.

Type	Botanical Name	Common Name	Flower Color	Description	Growth
Marginal	<i>Sisyrinchium californicum</i>	Yellow Eyed Grass	yellow	Small clumping grass with iris-like leaves. Yellow star flowers grow at tip of leaf.	Grows to 8" tall. Prefers moist soil. California native.
Marginal	<i>Symphoricarpos albus v. laevigatus</i>	Snowberry	pink, white	Deciduous shrub with clusters of pinkish flowers then white berries. Understory plant, good bird habitat. CA native.	Grows 4' tall and spreading. Prefers part shade. Tolerates very moist and dry soil.
Marginal	<i>Tellima grandiflora</i>	Fringe Cups	green, pink	Mounds of soft foliage with many small flowers blooming green and changing to pink. CA native.	Clumping shade plant. Grows 18-24" tall. Tolerates very moist to dry soils.
Marginal	<i>Vitis californica</i>	California Wild Grape		Deciduous vine with clusters of small edible grapes. Grows along streams. CA native.	Prefers moist conditions. Grows laterally if not staked. Grows to 30'.
