Plants for Wet Places

A Nursery Dedicated to the Sustainable Propagation
and Grow-Out of Wetland and Pond Plants

Ponds - Wetscapes - Rain Gardens - Graywater Systems - Native Restoration

orders@walkeravenuenursery.com

fax 707.341.5125

Price list available upon request.

Floaters can be shipped via carrier (shipping costs apply).

Water Plant Type is indicated the top right corner of each plant tag. This information lets the customer know where to place the plant in the water garden: Floating, Submerged, Emerging, Bog, Marginal, Landscape.

Floating wetland plants float free on the surface of the water with roots dangling in the water

Submerged plants must be below the water surface of a pond—leaves will float on or above water surface. Submerged plants cannot survive out of the water.

Emerging plants have their roots and part of their stems below the water surface, and their leaves and flower above the water surface. They can be planted from 2-6" below the water surface or in an area of the garden that is most always moist. Do not fully submerge.

Bog plants can be planted 2" below the water surface or in an area of the garden that is most always moist (these are called "Marsh Gardens"). This is the largest variety of water plants available. Do not fully submerge but keep wet at all times, in mud or sand.

Marginal plants grow at the interface of wetland and upland habitats. They prefer changing water levels and develop their roots as the water rises over their root ball and recedes.

Landscape water plants cannot be planted directly in a pond. They are landscape plants that like wet to very-wet soil. Do not submerge.

We will fax/email an order confirmation to you with delivery date by next Tuesday. If you have not heard from us, please call to confirm that your order was received.

If you are interested in an item not on the current list, give us a call. Our full catalogue is available on our website WalkerAvenueNursery.com.

For same week delivery, please get orders in by early Tuesday morning.

RETURN/EXCHANGE POLICY

All requests to return or exchange plants must be made within 48 hours of delivery to orders@walkeravenuenursery.com. Authorized returns are subject to a 20% re-stocking fee. We will not accept or replace plants which have died due to neglect or abuse. Please save all plants in their original containers and keep them wet. Overgrown plants may be exchanged upon request.

* Species known to be invasive have been marked with an asterisk. Please do not release in the wild.

Walker Avenue Nursery is an independent, family-owned nursery located on 10 acres in Sonoma County. The land has been dedicated as part of a water reclamation project that recycles water from the City of Santa Rosa. Our plants are grown entirely on reclaimed water and free of synthetic sprays and fertilizer. We use 100% organic worm castings or organic fertilizer sticks in all our new plantings. Some quart pots are biodegradable.

Thank you for choosing Walker Avenue Nursery. Special Orders Welcome

—Debbie & Daniel
