

Variety	Rhizome Type	Flower description	Flower Size & shape	Leaf color	Leaf size	Leaf spread	Growing notes
Conqueror	Marliac	Very free flowering; tricolored waterlily-- inner petals deep red, outer white then light pink	Stellate; 7-8"	Top-deep green; underside-green	10-11"	5 ft.	Prefers temp. Below 80-90°; Petals may burn in high temperatures; Med-lg pools
Chromatella	Pineapple	Very free flowering; light yellow	4-5.5"	Top green; underside reddish-purple	8-9"	3 ft.	One of best of hardies; good for any size pool, including tubs
Barbara Dobbins	Odorata & mexicana	Yellow & pink blush to shades of apricot	4-6", stand 4-6" above water; stellate	New leaves – faint mottling on top, light red-purple on bottom	8-10"	5-7 ft.	Warmer water (better in southern states)
Carnea	Marliac	Very free flowering; light pink to white, yellow center; cuplike shape	4.5-5"	Top, green; underside, red	7.5-8"	4-5 ft.	
Comanche	Pineapple	Very free flowering; orange changeable: first day yellow-apricot, second day gold-orange flushed pink, third day deep orange, yellow tips	Cuplike then stellate; 5-7"; fragrant	Top: green, bronzy when new; underside red, purple flecks	12 x 11"	4-5 ft.	More subject to crown rot than other changeables; Good for northern & southern states; medium-large pools
Sunny Pink	Odorata	Very free flowering; blushed medium pink with yellow towards center; full stellate; sweet fragrance		Top, green; underside red with heavy purple flecking	8-10"	6-8 ft.	Very prolific; large; blooms til late in season

Variety	Rhizome Type	Flower description	Flower Size & shape	Leaf color	Leaf size	Leaf spread	Growing notes
Colorado	Marliac	Very free flowering; soft pink shading to light peach (salmon pink); fragrant	3-4"; stellate; 3-4" above water	Top medium green; underside reddish-plum	5-6"	3-5 ft.	Does well in cooler water; Needs room to grow; Continues to bloom late in season
Perry's Double White	Marliac-tuberosa	Free flowering; pure white; stellate; no fragrance	6-7"	Top deep green; underside green	9-10"	4-5 ft.	Long bloom season; needs lg container (24 x 24 x 12") to form colony and best blooms
Splendida	Marliac	Very free flowering; inner petals reddish pink; outer petals light pink; large globular flower shape; fragrant	5-6"	Top green; underside brown	9"	4-5 ft.	Richer soil gives deeper colored blooms; med-lg pools
Hollandia (Darwin)	Marliac	Very free flowering; light pink; fragrant; double peony-style shape	6-7.5"	Top medium green; underside green	10-11"	4-5 ft.	Good cut flowers; med-lg pool
Rembrandt	Marliac	Free flowering; faint red blush turning deeper; cuplike shape; fragrant?	3-5"	Top, dark green with plum; underside, reddish-purple	4-5"	3-5 ft.	Tolerates part shade
Hermine	Marliac	White; stellate	5-5.5"	Top olive green, underside bronzy or purplish	7x6"	30"	Small pool or tub garden
Virginalis	Marliac	Very free flowering; white; cuplike shape; new blooms slight fragrance	4.5-5.5"	Top, green; underside, bronzy green	9"	3-4 ft.	Dependable performance

Variety	Rhizome Type	Flower description	Flower Size & shape	Leaf color	Leaf size	Leaf spread	Growing notes
Sunrise Yellow	Marliac-odorata	Free flowering in zones 6-10; less so in 3-5; yellow; stellate; very slight fragrance	7-9.5"	Top, green; underside, red; new spring leaves are frequently twisted and poorly formed— better as temperature warms	11 x 10"	4-5 ft.	Huge blooms, narrow pointed petals; one of four largest-flowered hardy lilies; crown rot in some nurseries; Better in warm or temperate regions
Joey Tomicick	Odorata	Very free flowering; bright yellow; full stellate; 3-4" above water	4-5"	Top med. Green; underside reddish-brown with flecking	8-10"	4-5 ft.	Prefers warmer water (southern states)
Steven Strawn	Marliac	Free flowering; deep red blushed with creamy yellow; stellate; no fragrance	4-5"	Top dark green; underside, reddish brown with heavy flecking	5-7"	3-5 ft.	Med-lg pools (I think they can grow in small because they do so well in pots)
Gloriosa	Marliac	Very free flowering; bright red with some flecking; slight fragrance	5"	Top green; underside purple-brown	8-9"	5 ft.	Was considered the best red hardy but has been decimated by crown rot; good for all size pools
Texas Dawn	Tuberosa-Marliac	Very free flowering; inner petals, rich yellow; outer petals, blushed pink; stellate; long, narrow petals; fragrant, lemony; up to 10" above water	6-8"	Top, green; underside purplish	8"	3-5 ft.	Best in zones 6-10; Any size pool
